View your class total for the selected time period

How to Battle

Log into Prodigy and click “Home.”

Choose the same server as your opponent.

Click the map and choose the same location as your opponent.

Click your opponent.

Click “Duel”.

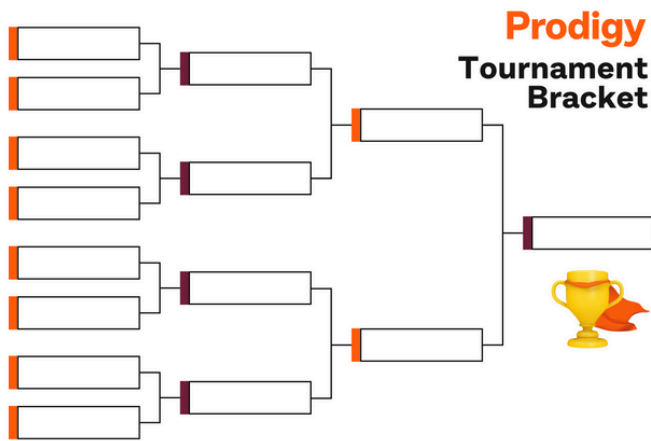

Go to Prodigygame.com/teachers to sign up today!

Classroom Tournaments

Host a tournament within your classroom! Have your students battle each other in a bracket style tournament to determine your class champion!

Bracket Style Tournament

Use any of the brackets included in this packet, or design your own! Have students battle each other and advance the winning student to the next round until you have a class champion!

Tip: pair students up by level in Prodigy, so they battle someone who matches their strength.

Short Tournament

1. Set a timer for 15-20 minutes and tell students to answer as many questions as they can in that time frame.
2. Have students log on and answer questions in Prodigy Math.
3. When the timer goes off, display the Student Leaderboard.
4. Sort the data by "Today" to see the top students.

Tip: check the leaderboard first to make sure students are at 0. If not, remember to subtract the original number from your total.

Long Tournament

1. Announce to the class that today is a Prodigy tournament!
2. Students can log onto Prodigy throughout the day.
3. At the end of the day, display the Student Leaderboard.
4. Sort the data by "Today" to see the top students.

School Tournaments

Host a school-wide tournament where classes compete against each other to answer the most questions in a day or week!

Bracket Style Week Long Tournament

**Prodigy
Tournament
Bracket**

Use any of the brackets included in this packet, or design your own! Have classes compete against each other to see who can be the school champion.

Monday: Pair up two classes to compete against each other to see who can answer the most questions correctly. At the end of the day, advance the winning classes to the next round.

Tuesday: Host round two to see which classes will advance to the next round.

Wednesday: Host round three to see which classes will advance to the next round.

Thursday: Host round four to see which classes move into the finals.

Friday: Host the championship and recognize the top three classes.

Calculating Results

View your class total on the Student Leaderboard.

Tip: make sure to sort the data by “Today” or “This week” depending on the tournament duration.

Student Leaderboard		Class Challenge	
Class correct answers		Last week	
RANK	NAME	CORRECT ANSWERED	ACTION
1	Jane H	76/81	View

3	Captain H	14/16	View

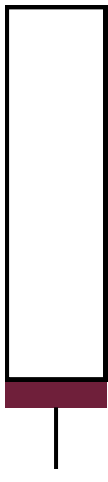

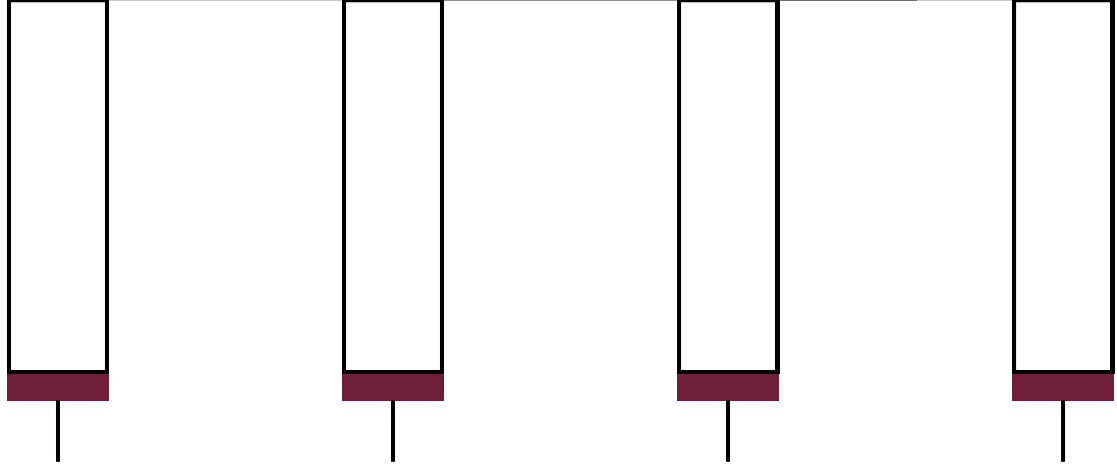

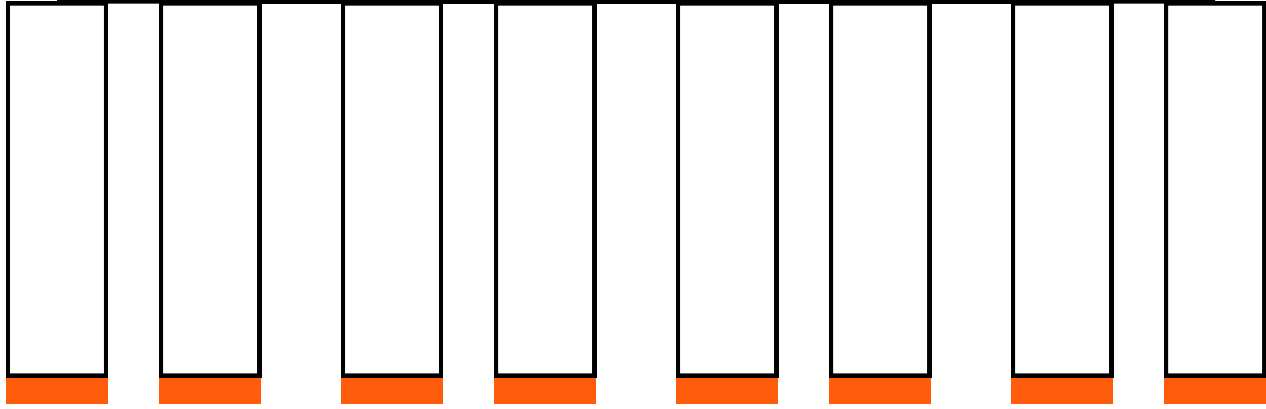

Week Long Tournament

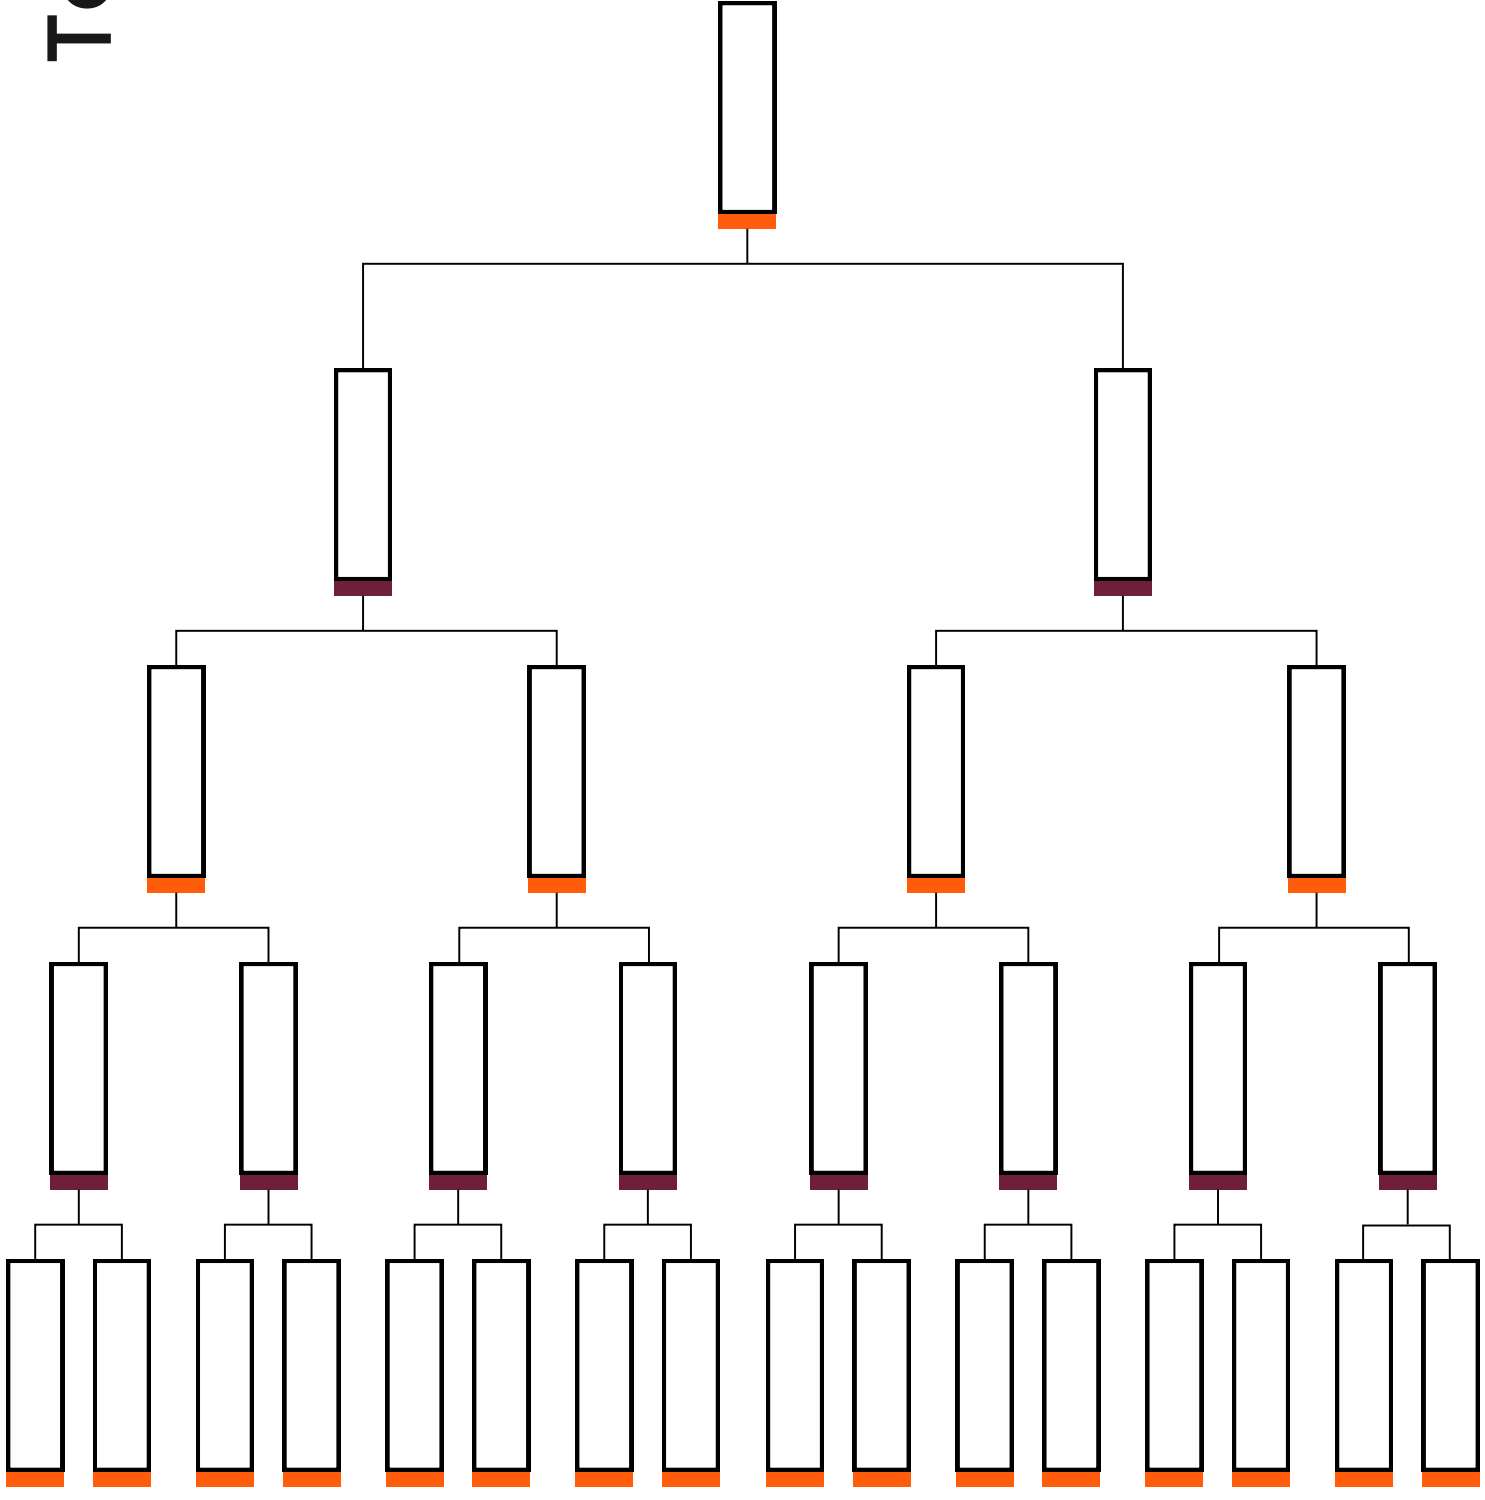

1. Announce that this week is a Prodigy tournament!
2. Students can log onto Prodigy throughout the week.
3. At the end of the week, have teachers view their weekly total on the student leaderboard.
4. Sort the data by “This week” to see only the data for the week long tournament.
5. Announce the top three classes in the school!
6. Optional: announce the top three students as well!

Tournament Bracket

Tournament Bracket

Tournament Bracket

The diagram illustrates a tournament bracket structure. It starts with 16 teams at the top, arranged in four groups of four. The teams are represented by white rectangular boxes. The bracket progresses through four rounds of matches, indicated by lines connecting the boxes. The winners of each match are represented by orange rectangular boxes, while the losers are represented by purple rectangular boxes. The final match is at the bottom, with a trophy icon above it. The trophy is a yellow cup with orange flames. The diagram is titled "Tournament Bracket" in large, bold, black text on the left side.
