

The Next Prodigy Tournament

FAQ

1. When is the tournament period?

The Next Prodigy Tournament runs from March 1st - March 31st, including weekends. Students are encouraged to play at school and if possible at home.

2. How do I know if my class code is registered?

If you've submitted your class code(s) within the [tournament sign-up form](#), and you've confirmed you've entered it correctly, you're signed up!

*Note: you must have at least 8 active students during the tournament time period in order to participate and appear on the leaderboard.

**If your classroom is synced with Clever, please provide your Class Name in place of your Class Code.

3. How do I know if my school or district is partnered?

This event is invite-only. You will receive an email with all the details to register and gain access to the leaderboard and webinars.

4. I have multiple classes. How do I register all of them?

To register multiple classes, simply register each class code individually within the sign-up form (class codes must be entered in all caps). For Clever users, please provide the exact name of your class on Prodigy in place of your Class Code.

You can register as many of your classes as you'd like to! You can give each class a fun nickname to help you easily find your score on the leaderboard.

*Note: only one class code may be submitted per entry, so you can complete the sign-up form multiple times.

5. How can I view the leaderboard?

You can find the leaderboard on the tournament page you registered on. It will automatically update daily so be sure to have it handy throughout the tournament period.

6. Does anything change for my participating students in-game?

Nope! Once you're signed up for the tournament, nothing will change for your students in-game. They simply need to continue playing Prodigy as usual.

7. How is our score calculated?

Your overall tournament ranking is based on questions accuracy (total questions answered correctly/total questions answered overall)

- Scoring calculation example: Class A answers 100 questions, 80 are answered correctly. Class A's score is 80%.
- Your class must answer at least 100 questions each week in order to appear on the accuracy leaderboard.
- Your class must have at least 8 students actively playing prodigy during each tournament week in order to appear on the leaderboard.
- Your class codes must be registered within the tournament [sign-up form](#).

8. I have less than 8 students. How can I participate?

To make things fair, you will need at least 8 active students in your class in order to participate. If you have less than 8 students, don't worry - you can still participate by temporarily adding students from a different class into yours until you have 8 active students. After the tournament ends, you can remove those students from your class. You can also extend the invitation to other students you may know.

For more information on adding students to your class, please refer to our [help article for adding students](#) or [sign-up for our self-guided learning courses](#).

*Note: adding a student to your class will not remove that student from their current class! They will simply join your class as well. This may differ for Clever users.

9. Can I invite other classes from my school to participate?

If you have another class at your school that would like to participate, they're more than welcome to! You can simply sign up their class for them using the [tournament sign-up form](#), or send the form to them!

10. My class should have X score. Why does the leaderboard say we have Y score?

The leaderboard displays the average questions answered per active student in your class - so at least 8 active students will need to work together to build up your average. Due to data limitations, the leaderboard is always 24 hours behind. Check back every day to see the previous day's results!

11. Which report(s) can I use to track our progress?

If you'd like to track your class progress on your own, check out the Student Usage Report. Simply tally up the total questions answered at home and at school, then calculate the overall average per student for the selected time period. We find Excel works best for this!

**Don't miss
your chance
to win big!**

The Next Prodigy Tournament

Rules

Your overall tournament ranking is based on question accuracy (total questions answered correctly/total questions answered overall)

- Scoring calculation example: Class A answers 100 questions, 80 are answered correctly. Score is 80%.
- Your class must answer at least 100 questions each week in order to appear on the accuracy leaderboard.
- Your class must have at least 8 students actively playing Prodigy during each tournament week in order to appear on the leaderboard.
- Your class codes must be registered within the tournament [sign-up form](#).

How to Win

Weekly winners:

- Determined with a raffle draw for all participating classes that have answered a minimum of 500 questions during each week.

Grand prizes:

- Awarded to the overall first, second and third place leaders out of all participating classes based on the highest question accuracy percentage per class in all four weeks.

Prizes

- Weekly raffle winners will receive one-month memberships for the entire class.

- Grand prizes for the three winning classes:
 - 1st Place: \$100 Amazon Gift card, 12-month Prodigy memberships for the whole class, and Prodigy swag
 - 2nd Place: \$50 Amazon gift card, 6-month memberships for the whole class, and Prodigy swag
 - 3rd Place: \$20 Amazon gift card 1-month Prodigy memberships for the whole class
